- 2.** Are your products tested on animals anywhere in the world?
- 3.** Are the ingredients that you use and the suppliers of those ingredients free from animal testing and if so, since what date/-year? How do you monitor this?
- 4.** Are your products for sale in regions that require animal testing, such as mainland China?
- 5.** Do you sell online in China through cross-border e-commerce? If so, what steps do you take to eliminate the risk of animal testing during customs inspections?
